

**SLEEPERS** 2007

single channel video, HD DVCPRO on DVD

13:40 min

“Sleepers” is set in the entrance hall of an airport. The camera moves slowly through the building passing by waiting passengers and trolleys loaded with luggage. Even if the space is crowded there is no major movement - everybody is asleep. The picture of transit passengers spending the night at airports has become normal in the times of cheap-airline fares. By moving inside this standstill “Sleepers” is portraying a non-moment in a non-place.
